SUMMARY

I am a skilled Data Analyst with experience in analyzing and visualizing data. I use Power BI, Excel, and Tableau to create interactive dashboards, and Python for data handling and processing. I enjoy solving problems and turning raw data into meaningful insights to help make better decisions.

EDUCATION

Degree	Specialization	Institute	Year	CPI
B. Tech	CSE (AI&ML)	Gayatri Vidya Parishad (A), Visakhapatnam	2021-2025	8.77
Intermediate	MPC	Sri Chaitanya Junior College, Visakhapatnam	2019-2021	9.47
SSC	General	Sri Chaitanya Techno School, Visakhapatnam	2018-2019	10.0

PROJECTS

Swiggy Analysis Project (Excel + Tableau + PowerBI + MySQL)

April 2025 – May 2025

- Developed an end-to-end Swiggy Analytics Dashboard using **MySQL**, **Excel**, **Power BI**, and **Tableau**.
- Imported and modeled raw data in MySQL, creating optimized SQL views for reporting.
- Designed Excel dashboards with **slicers**, **pivot charts**, and **visual summaries** for quick analysis.
- Built multi-page Power BI dashboards with **DAX measures** and advanced data modeling.
- Created interactive Tableau dashboards using **SQL View** with filters, visuals, and page navigation.
- Ensured smooth integration across platforms and enabled role-based performance tracking and exploration.

Media Analysis Project (Excel + Tableau + PowerBI + MySQL)

May 2025 – June 2025

- Built **interactive dashboards** for **Facebook Ads** using Excel, Power BI, and Tableau.
- Analyzed** ad spend, clicks, impressions, CTR, and **campaign-wise engagement trends**.
- Compared ad performance across age groups, time periods, and individual campaigns.
- Created dashboards for **LinkedIn Posts** using Excel, Power BI, and Tableau.
- Explored trends in views, reactions, followers, and engagement across topics and weekdays.
- Identified posting patterns and visualized performance using **multi-page LinkedIn dashboards**.

Database-Driven Exercise Monitoring System (Streamlit + Mediapipe + MongoDB)

March 2024 – July 2024

- Built Exercise Monitoring System using **Streamlit**, **MongoDB**, and **MediaPipe** for real-time **workout posture detection**.
- Enabled **trainers** to create/manage groups and assign exercise tasks to **trainees** with **live webcam-based validation**.
- Implemented secure **role-based login**, **password management**, and task progress tracking in **MongoDB**.
- Developed interactive dashboards for trainers and trainees to monitor workout performance effectively.

Exploratory Data Analysis (EDA) – (Python)

- Performed **Exploratory Data Analysis (EDA)** on finance data to identify trends, patterns, and business insights.
- Cleaned and preprocessed large datasets using **Python**, **Pandas**, and **NumPy** for accurate analysis.
- Created data visualizations using **Matplotlib** and **Seaborn** to understand data distribution, outliers, and correlations.
- Generated actionable insights from financial metrics to support business decision-making and performance analysis.

CERTIFICATIONS

- AWS Python Full Stack Virtual Intern Certificate.*
- AWS Data Analytics Virtual Intern Certificate.*
- Data Science Master Virtual Internship.*

SKILLS

Programming: Python, Java

Databases: MySQL, MS SQL Server, MongoDB

Excel: Power Query, Power Pivot, VLOOKUP, Pivot Tables, Charts and Dashboards

Data Visualization Tools: Power BI, Tableau

Data Analysis & Handling: NumPy, Pandas

Data Visualization Libraries: Matplotlib, Seaborn

Statistics: Descriptive and Inferential Statistics, Hypothesis Testing, Probability
